

GENERAL TERMS AND CONDITIONS

For recall notification provided to Northern after 5:00 p.m. and prior to 7:00 a.m., Northern should provide notification to all affected Replacement Shippers no later than 8:00 a.m. after receipt of such recall notification (CCT).

When a Releasing Shipper with recall rights desires to recall its capacity during an Intra-Day cycle, Northern's capacity release system will indicate to such Shipper the capacity available for recall based upon the EPC. Therefore, the Releasing Shipper's recall notification to Northern would reflect the adjusted total released capacity entitlement.

Northern shall not be obligated to deliver in excess of the total daily contract quantity of the release.

The amount of capacity allocated to the Replacement Shipper(s) should equal the original released capacity less the recalled capacity that is adjusted based upon the EPC.

When capacity is recalled, it may not be reput for the same Gas Day.
