

GENERAL TERMS AND CONDITIONS

4. Flow Orders. Northern needs the ability to call on volumes to flow at Carlton. The following operational requirements apply during the months of November through March for each year that the Carlton Resolution is in effect to the Carlton Sourcers and the Other Carlton Shippers Entitlement as applicable.

An operational flow order is an order issued to alleviate conditions, inter alia, which threaten or could threaten the safe operations or system integrity, of the transportation service provider's system or to maintain operations required to provide efficient and reliable firm service. Whenever a Transportation Service Provider experiences these conditions, any pertinent order should be referred to as an Operational Flow Order.
