

RATE SCHEDULE GS-T  
Firm Throughput Service

Northern will no longer provide service under Rate Schedule GS-T. A Shipper may convert its GS-T Firm Throughput Service, or a portion thereof, to an annual (12 months) Summer Season or Winter Season Recourse Rate TF or TFX Firm Throughput Service. Within 60 days of the FERC order accepting the removal of Rate Schedule GS-T, Northern will provide notice to Shipper requesting Shipper's election for TF or TFX Firm Throughput Service. Shipper shall have thirty (30) days from the date of tender in which to execute the service agreement and return it to Northern, or the service agreement shall be deemed null and void and the GS-T throughput service agreement will be terminated without further action by Northern. Shipper must execute a TF or TFX Firm Throughput Service Agreement to fully effectuate its conversion.
