

29.2 Curtailment

If Northern is experiencing a shortfall or excess in receipts which affect the operating integrity of its system, only until Northern is able to determine the Producer or Shipper who has failed to tender volumes equal to the volumes nominated and scheduled, Northern shall have the right, after providing as much advance notice as possible, to interrupt deliveries concerning the affected area as provided in the Receipt Point Supply Shortfall or Excess provisions of Section 19 of the GENERAL TERMS AND CONDITIONS of this Tariff.

A. Interruptible Throughput

After volumes have been scheduled, Northern has the right to curtail receipts and/or deliveries of natural gas below the scheduled volume if the available capacity for such quantity is reduced as a result of force majeure or any operational consideration reasonably determined by Northern. Northern shall curtail all scheduled Overrun volumes and scheduled volumes under Interruptible Throughput Service Agreements on the basis of the lowest path rate first.

B. Firm Services

In the event capacity must be allocated on part or all of Northern's system, Firm Throughput Services will be the last category to be curtailed. Such curtailment shall be allocated on a pro rata basis except as provided in Section 19, "Limitations on Northern's Obligation to Provide Firm Service" of the GENERAL TERMS AND CONDITIONS of this Tariff.
