

28.3 Intraday Nominations

An intraday nomination is a nomination electronically submitted after the nomination deadline whose effective time is no earlier than the beginning of the Gas Day and runs through the end of that Gas Day. The Evening, Intraday 1, Intraday 2 and Intraday 3 Nomination Cycles constitute Northern's standard Intraday nomination opportunities. For services that provide for intraday nominations and scheduling, there is no limitation as to the number of intraday nominations which a service requester may submit at any one standard nomination cycle or in total across all standard nomination cycles. Intraday nominations can be used to request increases or decreases in total flow, changes to receipt points, or changes in delivery points of scheduled gas. Intraday nominations may be used to nominate new market or supply. Intraday nominations do not roll over and are applicable to one (1) day only and must include an effective time. All nominations, including intraday nominations, will be based on a daily quantity; thus, an intraday nominator need not submit an hourly nomination. Intraday nominations will include an effective date and time. The interconnected parties will agree on the hourly flows of the intraday nomination. Intraday nominations do not replace the remainder of standing nominations. There is no need to re-nominate if intraday nomination modifies existing nomination.

Firm intraday nominations are entitled to bump scheduled interruptible service only during the Evening, Intraday 1 and Intraday 2 Nomination cycles. Northern will provide notice of the applicability and types of penalties to be effective the following Gas Day for any bumped volumes on its website by 3:00 p.m. prior to the Gas Day. During non-critical periods, daily penalties will be waived for bumped volumes on the date of the bump. Northern will provide a separate notice of bumping in the same manner in which Northern provides notice of operational flow orders. Northern will provide notification of bumped volumes through the scheduled quantities statement. Northern will also electronically communicate notice directly to bumped Shipper's in accordance with the grid-wide timeline for scheduled quantities. Northern shall provide affected parties with notification of bumping through the Shipper's choice of Electronic Notice Delivery Mechanism. Unless the affected party and Northern have agreed to exclusive notification via EDI/EDM, the affected party should provide Northern with at least one Internet E-mail address to be used for Electronic Notice Delivery of notification of bumping. The obligation of Northern to provide notification is waived until the above requirement has been met. Northern will support the concurrent sending of electronic notification of bumping to two Internet E-mail addresses for each affected party. Affected parties will manage internal distribution of notices received by Electronic Notice Delivery. Penalties related to the bumped volume will be waived if notice has not been provided.

Intraday nominations from a Shipper's effective FDD, PDD or IDD accounts will be scheduled subject to the storage parameters and available throughput capacity. If feasible, nominations throughout the Gas Day will be recognized to the extent they can be scheduled and confirmed. For firm service any such intraday nomination may not result in Shipper exceeding its MDQ. Shipper may nominate volumes in excess of the MDQ, but such nomination would be subject to the terms and conditions of the TI Rate Schedule.

Northern shall have the right at any time to limit acceptance of an intraday nomination on a non-discriminatory basis if system integrity will be placed in jeopardy. Such limitations may include, but are not limited to, a requirement that a receipt and delivery point must be either both in the Field Area or both in the Market Area. Any such limitation shall be posted on Northern's website with its justification.
