

RATE SCHEDULE PDD
Preferred Deferred Delivery Service

A transportation rate and fuel is charged both into and out of a Field Area storage point. Except as provided below with regard to a transportation point and its associated storage point, a transportation rate and fuel is charged for delivery to the Ogden storage point. If redelivery from Ogden is to a Market Area point, there is no additional transportation or fuel charge. If the redelivery is to a Field Area point, the Field Area mileage/MID transportation rate and fuel is charged. To the extent a volume is transported between a pooling point and its associated storage point, no transportation fee or fuel shall be assessed. With the exception of Ogden, to the extent a volume is transported from a storage point to a transportation point other than its own associated transportation point then a transportation fee and fuel will be assessed.

When the Ogden Storage point is used, the Shipper must use the same type of service (i.e., firm or interruptible) to transport to and from the storage point, unless agreed to otherwise by Northern on a non-discriminatory basis. However, in the event interruptible transportation service was used injecting into the PDD account, capacity release may be utilized, under the terms and conditions of Section 47, Capacity Release, to transport quantities from the PDD account.
