

RATE SCHEDULE PDD
Preferred Deferred Delivery Service

A transportation rate and fuel is charged both into and out of a Field Area storage point. Notwithstanding the above, to the extent a volume in the Market Area or Field Area is transported between a transportation point and its associated storage point, no transportation commodity rate or fuel charges shall be assessed. A transportation commodity rate and fuel is charged for delivery to the Ogden storage point. If redelivery from Ogden is to a Market Area point, there is no additional transportation commodity or fuel charge. If the redelivery is to a Field Area point, the Field Area mileage/MID transportation rate and fuel is charged. With the exception of Ogden, to the extent a volume is transported from a storage point to a transportation point other than its own associated transportation point then a transportation fee and fuel will be assessed.

In addition, there will be no transportation commodity rate or fuel charges for volumes transported:

1. From a Market Area storage point to MID 17 pooling point.
2. From a Market Area Receipt Point to the MID 17 deferred delivery point (POI 71459).
3. Between the Ventura point (POI 192) and Ventura deferred delivery point (POI 71460).
4. From a Field Area storage point to a Field Area pooling point in the same MID.
5. From a Field Area Receipt Point to a Field Area MID storage point in the same MID.

When the Ogden Storage point is used, the Shipper must use the same type of service (i.e., firm or interruptible) to transport to and from the storage point, unless agreed to otherwise by Northern on a non-discriminatory basis. However, in the event interruptible transportation service was used injecting into the PDD account, capacity release may be utilized, under the terms and conditions of Section 47, Capacity Release, to transport quantities from the PDD account.

5. PDD POINTS OF SERVICE

Shipper shall specify any of the designated storage points listed in Sheet No. 135E as its injection and withdrawal point.
