

GENERAL TERMS AND CONDITIONS

- (3) volumes delivered under Rate Schedule(s) TF in the following order: (i) scheduled overrun volumes, if any, and (ii) up to the MDQ's of the TF services.
- B. Multiple Shippers. For billing purposes, to the extent Northern is transporting gas to a Point(s) of Delivery for more than one (1) Shipper, the Shipper shall cause the party receiving the gas for Shipper's account at such Point(s) of Delivery ("Receiving Party") to advise Northern of the priority between Shippers in which said Receiving Party will receive the other Shippers' scheduled gas. If Northern has not been advised of a priority, the Default Order in "A" above shall apply. Provided however, if the Receiving Party is also a TF Shipper, then, for billing purposes, gas being transported and delivered at the subject Point(s) of Delivery for the Receiving Party Shipper's TF Agreement shall be deemed to be the last transportation volumes scheduled through the meter (last-through-the-meter methodology) preceded by any other agreements in the Default Order unless agreed to otherwise by Northern and the Receiving Party prior to the close of business of the production month, or unless the Receiving Party has chosen to provide the measured volumes as stated below in paragraph E.
- C. GS-T Receiving Party Shipper(s). For monthly billing purposes, the determination of the BTQ at a delivery point(s) where a GS-T Shipper is the Receiving Party shall be in the following order unless agreed to otherwise by Northern and the GS-T Receiving Party Shipper prior to the close of business of such production month:
- (1) volumes, including overrun volumes, scheduled for delivery under Rate Schedule TFX, if any;
 - (2) volumes delivered under Rate Schedule(s) TF in the following order: (i) scheduled overrun volumes, if any, and (ii) up to the MDQ of the TF services, if any;
 - (3) volumes delivered under Rate Schedule(s) GS-T in the following order: (i) scheduled overrun volumes, if any, and (ii) up to the MDQ of the GS-T service, if any; and/or
 - (4) volumes, including overrun volumes, scheduled for delivery under Rate Schedule TI, if any.
- D. In the event there is more than one service agreement under any rate schedule, for purposes of billing in (A), (B), and (C) above, the volumes shall be allocated pro-rata to each service agreement based on scheduled volumes, unless agreed to otherwise.
- E. End-user(s) on Downstream Systems. The Receiving Party may choose to provide the measured volumes for the parties receiving gas downstream of the Point(s) of Delivery. Under this option, the Receiving Party will furnish Northern with measurement data for the end user prior to the close of business of the production month. In such event the end user shall be responsible for its resulting daily delivery variance charges, imbalances, and all other applicable throughput charges resulting from its measured volumes. The Receiving Party must provide reasonable notice to the end user and Northern of such arrangement prior to effectuation of such procedure.
