

198/ Continued

If any delivery points located in MIDs 8-16A are scheduled on any day under the Agreement, the Reservation Rate set forth herein shall not be applicable for such quantities and the rate charged for such service for the entire month shall be \$0.40/Dth/day during the winter and \$0.32/Dth/day during the summer for the amount scheduled to such points for the day, provided that the monthly scheduled quantity to MIDs 8-16A does not exceed 175,000 Dth during the months of January through May and September through December, and 350,000 Dth during the months of June through August. If quantities are scheduled to delivery points located in MIDs 8-16A above these quantities the rate set forth herein shall not be applicable and the rate shall be \$0.40/Dth/day during the winter and \$0.32/Dth/day during the summer for the entire contract MDQ for the entire month, unless otherwise agreed.

Unless otherwise agreed by the Parties, the Reservation Rate shall apply only to the Primary Receipt Point quantities at the Permian Pool Point (POI #54009) or Midcontinent Pool Point (POI #61020) (Pool Quantities), if the Pool Quantities are contracted at the levels shown in Appendix A of this Agreement; provided, however, Shipper may, between February 1, and September 30, realign primary receipt point entitlement for the Pool Quantities to other Field Area primary receipt points for only May through September of the same year (Summer Period), unless otherwise agreed to and subject to available capacity and Northern making any required postings or open seasons. Unless otherwise agreed, if Shipper realigns any Pool Quantities away from the Permian Pool Point or MidContinent Pool Point (except as discussed above in this subparagraph) the rate for all Pool Quantities will be increased to \$0.40/Dth/day for the upcoming Summer Period. For any other receipt point realignment, the realignment will be effective through the remaining term of the Agreement.

The firm maximum daily quantity under this Agreement varies monthly throughout the year through the term between 58,333 Dth/day to 210,000 Dth/day.
