

GENERAL TERMS AND CONDITIONS

- (iii) Northern shall determine at the time of filing its PRAs, based on its system configuration and operational experience whether mainline compression was used in connection with transactions involving certain MIDS. At the time of filing, Northern will provide a full explanation of any changes in system configuration and operational experience related to the use of mainline compression, and parties will have the right to challenge any proposed changes in the PRA filing.

FDD Storage Fuel

The FDD Storage Fuel calculation is the Fuel Percentage applicable to FDD volumes injected during the Injection Period. The FDD Storage Fuel Percentage is calculated by dividing the applicable twelve-month actual storage Fuel, as provided for in the PRA Settlement, by the projected FDD Storage injections during the Injection Period.

Unaccounted-For (UAF)

The UAF percentage is calculated by dividing the twelve-month actual UAF gas for the respective PRA Period, by the Throughput for the same PRA Period. UAF is not collected for transportation from any receipt point in any MID to the delivery point at MID 16B.
